

# FRONTE ESSENZIALE: COMPLETELY NATURAL AND UNIQUELY RICH IN MINERALS

Choose your mineral water wisely:  
every water is different from each other.

The type of rocks the water has flowed through for many years before reaching its source widely influence the quality, pureness and mineral composition of each individual mineral water.

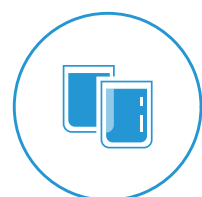

**Fonte Essenziale** is a natural mineral water that, thanks to its unique composition, **rich in minerals** such as Sulphates and Magnesium, supports the liver and as a result **stimulates bowel movement**, helping your body to feel light again.

Feel free from **constipation** and **bloating** with a unique water: Fonte Essenziale is **different from other mineral waters**; compare its Sulphates and Magnesium content with the UK's best selling mineral waters\* in the Comparative Table below.

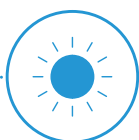

Comparison between Fonte Essenziale and the main mineral waters in the UK\*

| Mineral Waters   | Magnesium (mg/L) | Sulphates (mg/L) |
|------------------|------------------|------------------|
| Fonte Essenziale | 91.0             | 1611.0           |
| Evian            | 26.0             | 12.6             |
| Buxton           | 19.0             | 13.0             |
| Highland Spring  | 10.1             | 5.3              |
| Volvic           | 8.0              | 9.0              |
| Nestlé Pure Life | 10.5             | 9.2              |
| Brecon Carreg    | 15.0             | 9.0              |
| Ice Valley       | 7.0              | 11.0             |
